TECHNICAL SKILLS

Backend & Security

- PHP
- Laravel
- Laravel Breeze
- Spatie Permissions
- JavaScript
- Python (learning)

Frontend & UI

- React.js
- HTML5
- CSS3
- Tailwind CSS
- Data Dashboards

Databases

- MySQL
- PostgreSQL
- SQLite

APIs & Tools

- REST APIs
- Axios / Fetch
- Git
- GitHub

EDUCATION

Associate Degree in Systems Analysis & Software Development

Instituto Sedes Sapientiae — Argentina
2023 - 2025 · Completed

LANGUAGES

- SpanishNative
- EnglishTechnical / Professional

PROFILE

Systems Analyst and Full Stack Developer focused on backend engineering with PHP and Laravel, and modern responsive interfaces with Tailwind CSS and React.js. Experienced designing scalable application architectures, implementing secure authentication (Laravel Breeze) and role-based access control (Spatie Roles & Permissions), and building interactive dashboards for data visualization. Comfortable working with relational databases (MySQL, PostgreSQL, SQLite) and consuming/building RESTful APIs. Currently expanding into React.js for production frontends and learning Python.

FEATURED PROJECTS

Ice Cream 360 IN PROGRESS

Inventory & sales management platform with an analytics dashboard

- Architected a scalable Laravel backend for centralized inventory tracking and multi-branch sales recording.
- Implemented secure authentication with Laravel Breeze and granular access control using Spatie Roles & Permissions.
- Built an administrative dashboard with interactive charts covering top-selling items, monthly revenue, and sales trends.
- Delivered a responsive UI with Tailwind CSS, progressively integrating dynamic React.js components.

- PHP
- Laravel
- React.js
- Spatie Permissions
- Tailwind CSS
- MySQL

Fast Food E-Commerce IN PROGRESS

Online food-ordering platform with shopping cart and role-based access

- Built an e-commerce app for food ordering with an intuitive flow for browsing menus and managing order states.
- Engineered an interactive shopping cart with real-time item addition, modification, and total price calculation.
- Configured role management for Clients and Administrators using Laravel Breeze and Spatie Permissions.
- Delivered a mobile-first, responsive UI using Tailwind CSS and agile frontend practices.

- PHP
- Laravel
- JavaScript
- Tailwind CSS
- MySQL

WORK EXPERIENCE

QA Software Tester — Internship

Sep 2024 - Oct 2024

Rebrit

- Executed functional software testing, logging and documenting bugs to uphold high quality standards.
- Gained hands-on experience with testing methodologies, requirements analysis, and test case evaluation.
