PROFESSIONAL SUMMARY

Systems Analyst and **Software Developer** specialized in backend engineering with **PHP (Laravel)** and responsive web development using **HTML5, CSS3, and Tailwind CSS**. Hands-on experience designing robust application architectures, implementing user authentication (Laravel Breeze), role-based access control (Spatie Roles & Permissions), and interactive data visualization dashboards. Proficient in relational database management (MySQL, PostgreSQL, SQLite) and RESTful API integration. Continuously expanding technical capabilities by adopting **React.js** for modern frontend interfaces and learning **Python**.

TECHNICAL SKILLS

Backend & Security:	PHP (Laravel), Spatie Permissions, Laravel Breeze , JavaScript, Python (Currently learning).
Frontend & UI:	HTML5, CSS3, Tailwind CSS (Strong proficiency), React.js (Active component development), Interactive Dashboards & Data Visualization.
Databases:	MySQL, PostgreSQL, SQLite (Relational schema design & query optimization).
APIs & Tools:	RESTful API design and consumption (Fetch API / Axios), Git, GitHub.

SOFTWARE ENGINEERING PROJECTS

Ice Cream 360 – Inventory & Sales Management System

Active Development

Web Management Platform with Analytical Dashboard & Key Metrics

- Architected a scalable backend with **PHP / Laravel** for centralized inventory tracking and multi-branch sales recording.
- Implemented secure authentication with **Laravel Breeze** and granular access control using **Spatie Roles & Permissions**.
- Designed and integrated an **analytical administrative dashboard with interactive charts** to track key performance indicators (top-selling items, monthly revenue, and sales trends).
- Built a modern responsive UI using **Tailwind CSS** and progressively integrated dynamic components with **React.js**.

Technologies: PHP, Laravel, Spatie Roles & Permissions, Breeze, React.js, Tailwind CSS, MySQL.

Fast Food E-Commerce – Online Ordering Platform

Active Development

Interactive Web Ordering Application with Shopping Cart Capabilities

- Developed an e-commerce web app tailored for food ordering, featuring an intuitive user experience for browsing menus and managing order states.
- Engineered an interactive **Shopping Cart module** supporting real-time item addition, modification, and total price calculation.
- Configured robust user role management (Clients and Administrators) utilizing **Laravel Breeze** and **Spatie Permission**.
- Delivered a mobile-first, responsive visual interface using **Tailwind CSS** and agile frontend practices.

Technologies: PHP, Laravel, Spatie, Breeze, Tailwind CSS, JavaScript, HTML5/CSS3, MySQL.

WORK EXPERIENCE

QA Software Tester – Internship | Rebrit

Sep 2024 – Oct 2024

- Executed functional software testing, logging, and documenting bugs to ensure high software quality standards.
- Acquired hands-on experience in testing methodologies, requirements analysis, and test case evaluation.

EDUCATION
